PART I: EPP Quality Assurance System

Introduction

Part I of this handbook provides an overview our current Quality Assurance System (QAS). This handbook describes the aspects of the EPP's QAS, including the EPP's key assessments, the reporting and feedback mechanisms for data review and recommendations, and data and review teams. Part II outlines how program data are collected and used for continuous improvement and reporting.

To ensure that we prepare teachers and education professionals who embody our Core Values of Equity, Excellence, and Ethics, the Educator Preparation Provider (EPP) uses key assessments for programs that lead to initial and advanced certification. These key assessments reflect on our programs' overall effectiveness in supporting our candidates' learning and growth. Through the QAS, the EPP can monitor our candidates' progress toward becoming effective educators with the knowledge, skills, and dispositions to impact P-12 student learning positively. Also, the complement of key assessments was strategically selected and placed in the programmatic curriculum to ensure the EPP has data to engage in an ongoing review and reflection through an iterative process that supports continuous improvement within our education programs and in the EPP. Our QAS is only functional if it has the capability to provide actionable data and data analyses that support an ongoing improvement function. Your input is always welcome, and you may email SchoolofEdSuggestions@qc.cuny.edu.

Overview of Our Quality Assurance System

The EPP developed the Quality Assurance System (QAS) with input from multiple stakeholders. The QAS aims to ensure that we provide a comprehensive assessment model for aiding in strategic analyses and making recommendations for continuous improvement. Decision-making should be data-driven and triangulated across measures, transition points, and/or stakeholder perspectives. Assessments need to be strategically placed across programs and at appropriate transition points in programs to adequately capture candidate progress, completer achievement, and operational effectiveness in a timely and efficient manner.

The EPP's Quality Assurance System is comprised of five components:

- 1) Well-designed and strategically placed assessments;
- 2) Data that are valid and reliable;
- 3) Ongoing communication mechanisms and feedback loops;
- 4) Representative data teams across the EPP to analyze, interpret, and recommend; and
- 5) Mechanisms for monitoring changes at the programmatic and EPP level.

QAS #1: Well-designed and Strategically Placed Assessments

The EPP adopted key assessments that collectively ensure the EPP has a comprehensive assessment system gleaned from multiple sources and perspectives and includes candidate progress, completer achievement, and operational effectiveness. While education programs leading to initial and advanced certifications share some key assessments, each set of education programs also has specific key assessments to measure candidate knowledge, skills, and dispositions. The table below outlines the key assessments for programs leading to initial and advanced certification.

Key Assessments				
Programs Leading to Initial Certification	Programs Leading to Advanced Certification			
ProCADS	Program Assessments of Knowledge, Skills, and Dispositions			
Clinical Experience Survey				
Practice QCTPA Components (Plan, Teach, Assess, Reflect)				
Educating All Students (EAS): NYS Certification Exam				
Content Specialty Test (CST): NYS Certification Exam				
Queens College Teacher Portfolio Assessment (QCTPA) ⁱ				
Cumulative Grade Point	t Average at Completion ⁱⁱ			
Complet	er Survey			
Alumni Follow-Up Survey				
Employer Survey				
Alumni Im	npact Study			

Definition of Transition Points:

The EPP defined four critical points in our candidates' success as they progress through our programs and beyond. We call these points transition points and designate corresponding assessments that measure our candidates' developing competencies and progression at each point. Having these defined transition points allows the EPP to organize the data through annual data reports for analysis as they move through our QAS.

Transition Point #1: Admission – This point captures data on candidates upon admission to one of our education programs. Data at this transition point allows the EPP to assess prior academic preparation, gauge interest, and influential factors, and see how the candidates assess their dispositions and competencies before any influence from our education preparation programs. It provides a starting point to gauge growth over time.

Transition Point #2: Progression – This point captures data on candidates as they progress through their educator preparation program. At this transition point, the EPP can assess how a candidate is developing in the content and pedagogy related to the area of teaching or specialization, how their dispositions and competencies are changing based on their progress in the program, and the depth and breadth of experiences related to courses and fieldwork requirements.

Transition Point #3: Completion—This point captures data on candidates at program completion. The EPP can examine the program's growth and impact through various assessments. The EPP can gauge the candidates' academic preparation and completer satisfaction with their preparation and see how their dispositions/competencies have been impacted. The EPP can also assess the depth and breadth of the candidates' clinical experiences.

Transition Point #4: Follow-Up – This point captures alumni and employer satisfaction data with the EPP's preparation. The transition point captures data on alumni teaching for at least one year after program completion. Assessments provide data on satisfaction and relevance of program preparation. In addition, the EPP works with alumni to capture their impact on the P-12 student learning community. Alumni employers are also surveyed to capture their perceptions of alumni preparation.

It is essential to understand that the full complement of our key assessments is strategically placed and selected to meet various goals. The table below illustrates how the assessment "system" captures data over time with different CAEP standards. Appendix A shows how the EPP key assessments align with designated program courses.

Key Assessments by CAEP Standard and Unit of Analysis						
			U	NIT OF ANALYS	SIS	
		Candidate	Progress	Completer A	Achievement	Operational Effectiveness
EPP KEY Assessments	CAEP Standard	Transition 1: Admission to an EPP Program	Transition 2: Candidate Progression	Transition 3: Program Completion	Transition 4: Post- Graduation Follow Up	
ProCADS	1,3,5	\checkmark	\checkmark	\checkmark		
Clinical Experience Survey	2, 5		\checkmark			
Practice QCTPA Components (Plan, Teach, Assess, Reflect)	1,3,5	\checkmark	\checkmark			\checkmark

Cumulative GPA at Completion	1,3,5			\checkmark		\checkmark
Completer Survey	1, 2, 5			\checkmark		
Alumni Follow-Up	1,5					
Employer Survey	1,5					
Alumni Impact Study	1,4,5					

QAS #2: Valid and Reliable Data

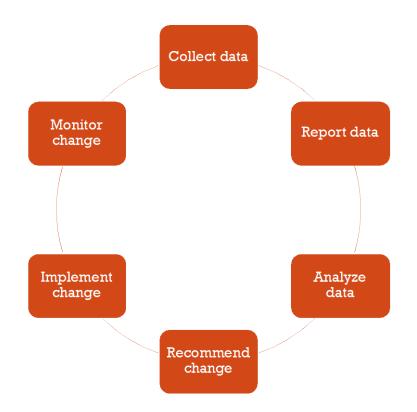

The EPP uses a suite of reliable and valid assessments, including a mix of EPP-created and propriety assessments. The table below outlines the technical specifications of the current EPP Key Assessments. Appendix B provides more detailed information, including links to the assessments.

Administered at key points in a candidate's progression through an EPP program, data are strategically analyzed to measure candidate preparedness to become effective educational professionals and monitor program-level and EPP-level change.

EPP KEY ASSESSMENTS		RELIA	BILITY	VALIDITY
		Inter-Rater Agreement	Internal Consistency	Content or Construct Validity
ProCADS	Proprietary	Х		Х
Clinical Experience Survey	EPP-created	N/A	N/A	N/A

Employer Survey	EPP-created	N/A	N/A	N/A
Alumni Impact Study (AIS)	EPP-created	Х	N/A	Х

QAS #3: Ongoing Communication Mechanisms and Feedback Loops

Our Quality Assurance System is designed to ensure that the EPP has a sustainable process for documenting operational effectiveness by documenting how data enters the system, how data are reported and used in decision-making, and how the outcomes of those decisions inform programmatic improvement. The graph below shows the interrelationship among the five components of our QAS, which is designed to "close the loop" for continuous improvement.

The EPP collects data at different transition points throughout the various programs. These data are reported to representative data teams across the EPP to analyze, interpret, and make recommendations (see the section below on these data teams) by the Office of Assessment & Accreditation. The Office of Assessment & Accreditation creates and shares data reports with the representative data teams who analyze the data. Recommendations are gleaned from the data analysis and sent to the Office of Assessment & Accreditation, which then collects and shares recommendations for review and implementation.

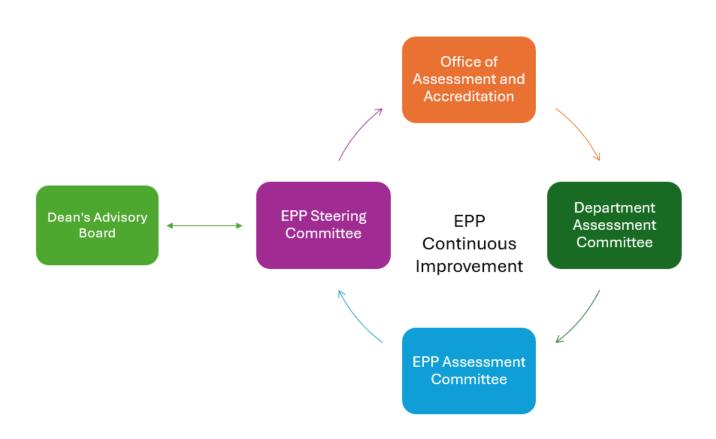

QAS #4: Representative Data Teams Across the EPP to Analyze, Interpret, and Recommend

The EPP created several standing committees to develop representative data teams that maximize stakeholder engagement in monitoring the overall quality and effectiveness of our programs:

- The Department Assessment Committees (DACs);
- The EPP Assessment Committee (EAC);
- Dean's Advisory Board for P-12 Education; and
- The Executive Steering Committee (ESC);

The EPP uses standardized data reporting and recommendation mechanisms that flow through each standing committee. Data and recommendations move through these committees, as illustrated in the

graph below. The Office of Assessment & Accreditation is the central location that produces recommendation summary reports for planning, implementation, and monitoring consideration.

EPP Quality Assurance System: Data Flow and Analysis

Departmental chairs select members for the DACs and EAC in consultation with the Dean of the School of Education. The ESC is composed of departmental chairs and program heads. The Dean's Advisory Board for P-12 Education comprises faculty, P-12 partners, community partners, and recent alumni. The Dean of the School of Education invites members to join the AB and mediates the data reports and recommendations that the AB considers.

Department Assessment Committees (DACs)

Each department has its own DAC, which analyzes and interprets program-specific data and makes recommendations to the EAC for change. Members of DACs also serve on EAC to ensure streamlined communication between the Departments and the EPP. DACs meet regularly, having at least one meeting per semester. DACs review the data reports produced by OAA. DACs may also request and review other program data. DACs also meet to review assessment tools, procedures, and policies concerning accreditation standards. Meeting minutes are shared with OAA to facilitate communication

and sharing. OAA places all committee meeting minutes in a shared OneDrive folder for EPP Assessment & Accreditation.

EPP Assessment Committee (EAC)

The EPP departments and program are central to the operations of the EPP (e.g., advisement, clinical experiences, assessment, recruitment). The purpose of the EPP Quality Assurance System is to gather quality data on EPP's effectiveness at producing competent educators and to use that data for continuous improvement. The EAC is responsible for establishing EPP-wide assessment priorities, analyzing and interpreting EPP-wide data, providing oversight of programmatic assessments, and developing recommendations and policies for continuous improvement. EAC reviews the DAC data reports before they are sent to the DACs and reviews recommendations before they are presented to the ESC. Meeting minutes are stored in a shared OneDrive folder for EPP Assessment & Accreditation.

Dean's Advisory Board for P-12 Education

The Dean's Advisory Board (AB) reviews data and makes recommendations specific to the EPP's clinical experiences and practices and our P-12 partnerships to ensure our partnerships are high-quality and mutually beneficial. Membership includes faculty, field and clinical supervisors and/or coordinators, school and community partners, and recent alumni. The Dean of the School of Education chairs the AB, which meets at least once per semester. The Dean mediates the data and recommendations between the ESC and the AB. Meeting minutes are stored in a shared OneDrive folder for EPP Assessment & Accreditation.

Executive Steering Committee (ESC)

The ESC oversees the quality of the EPP's programs by ensuring that the appropriate structures, policies, and procedures are in place to collect, analyze, and utilize valid and reliable data in the EPP's ongoing evaluation and continuous improvement process. The ESC is chaired by the Dean of the School of Education and includes campus stakeholders and faculty across both initial and advanced programs. Membership in the ESC is distinct from members on DACs, EAC, and the AB to have a diverse stakeholder group from among EPP leadership to respond to the recommendations with a fresh perspective. The ESC also monitors EPP-wide changes and special innovations and/or initiatives. Meeting minutes are stored in a shared OneDrive folder for EPP Assessment & Accreditation.

Stakeholder Engagement

To have a systematic mechanism in place for stakeholder involvement in decision-making, program evaluation, and implementation of changes for improvement, the EPP developed a multi-pronged approach to broaden stakeholder engagement by ensuring:

- Representative standing committee teams include candidates, alumni, faculty, and school and community partners;
- Triangulation of data from multiple perspectives; and
- Extending EPP reach through the website and a designated 'suggestions' email.

As shown in the table below, our stakeholders (alumni, faculty and staff, administration, P-12 school, community partners, and employers) participate across our standing committees and are engaged in data analysis, interpretation, and action recommendations. By ensuring that stakeholder involvement informs our standing committee memberships, the EPP invites multiple perspectives for data triangulation.

		Stakeholder Engagement by Committee				
EPP Committees	Alumni	Faculty and Staff	College/EPP Leadership	P-12 School and Community Partners	School and Community Agency Employers	
DAC/EAC		Х	Х			
Dean's Advisory Board for P-12 Education	х	х	х	х	Х	
Executive Steering Committee		х	х			

EPP Committee Meeting Calendar

The EPP's QAS also includes a standard meeting calendar (see below). This calendar allows EPP committees to plan for data review and analysis.

		FALL		
COMMITTEE	September	October	November	December
DAC		Х		Х
EAC	X		Х	
P-12 AB			Х	
ESC				Х

		SPRING		
COMMITTEE	February	March	April	Мау
DAC		Х		Х
EAC	Х		Х	
P-12 AB			X	
ESC				Х

QAS #5: Mechanisms for Monitoring Changes at the Programmatic and EPP level

The Office of Assessment & Accreditation (OAA) collects and monitors data from the EPP's key assessments at each transition point. OAA reports the data in data reports that include some standard information (see Appendix C). OAA provides the Departmental Assessment Committees (DACs) with programmatic (disaggregated) data. The EPP Assessment Committee (EAC) and the Dean's Advisory Board for P-12 Education (AB) may be provided with additional data and EPP-level data for review. The DACs return the data recommendation form to OAA with recommendations. OAA summarizes the DAC

recommendations and submits the summary to the EPP Assessment Committee (EAC) for review, action, and follow-up. The ESC will also be responsible for monitoring the efficacy of changes made.

Each data report is created by OAA, and includes the following information:

- Description of the Data Context
- Data Highlights
- Data Chart

PART II: Program and Course Assessments

Part II explains program-specific assessments and their roles in our assessment and accreditation process. All EPPs seeking CAEP accreditation must undergo a program review process. Program reviews provide valuable information about candidates' knowledge and professional skills in a specific area of licensure/certification and preparation experiences. Program review requires gathering evidence that can be used to support CAEP's standard 1 – candidates' content and pedagogical knowledge and application.

Program-Specific Data and Our Assessment Management System

Each program must collect data on candidates' knowledge, skills, and dispositions related to program outcomes and goals. Each program designed assessments based on national and state standards to capture candidates' abilities throughout their program progression. The data from these assessments are used for program improvement and to address reporting requirements for accreditation.

The EPP uses Anthology Portfolioⁱⁱⁱ as its data management system. Anthology Portfolio is a web-based e-portfolio system required for all candidates in educator and professional preparation programs at Queens College. Each program works with the Office of Assessment and Accreditation to create a specific portfolio containing key EPP assessments. Candidates submit key assessments through Anthology Portfolio, and instructors can collectively assess candidate work.

Anthology Portfolio is used for the following common assessments:

Clinical Experience Survey Form A, B, C ProCADS at T2 & T3^{iv} Practice QCTPA Components QCTPA Advanced Program Assessments of Knowledge, Skills, and Dispositions EPP Completer Survey

Anthology Portfolio allows candidates to build an unlimited number of portfolios to showcase a collection of artifacts that reveal a variety of accomplishments and display how they have fulfilled assignments. Candidates can also use Anthology Portfolio to share their reflections on assessments and benchmark performance tasks required throughout their academic and working careers.

In addition, Anthology Portfolio is also used to capture data on clinical experiences via Experiential Learning. The Field Placement Office creates a specific placement for a candidate's student teaching, internships, or practicum experience. This placement in Anthology Portfolio contains surveys, assessments, and timesheet logs for candidates to complete. It will also contain surveys and assessments for the clinical educators (e.g., cooperating teachers, field site supervisors, and/or Queens College field supervisors).

Confidentiality

Candidates provide Anthology Portfolio with information such as assignments, work products, and assessment rubrics that identify their content. This information will be available only to assessors and/or administrators with Anthology Portfolio IDs and passwords within our institution or stakeholders granted trusted external access for our institution to carry out their duties to which they have agreed by the right of their membership. Personal information such as addresses and phone numbers are NEVER required in Anthology Portfolio and should not be published there.

All data collected by the EPP are designed to inform program review and improvements. All data reports are aggregated anonymously to compile statistical and performance information related to the EPP's operation. The EPP uses these data to improve program quality and candidate success.

Anthology Portfolio Training

The Office of Assessment and Accreditation created a training webinar to acquaint faculty with Anthology Portfolio. Please feel free to access the training webinar at the following link below:

https://tinyurl.com/FacWebVid

If you need further assistance, please reach out to us via email at <u>AnthologyQCSupport@qc.cuny.edu</u> or by calling us at (718) 997-5218.

Brief Summary of Changes to the Quality Assurance System

Since implementing the Quality Assurance System (QAS), the EPP has continued to refine it. For the 2024-2025 academic year, the following changes will be integrated into the QAS.

- The EPP agreed to use the candidates' cumulative grade point average at T3 (program completion) as a measure of candidates' progress and success in initial certification programs across the EPP. This will ensure program quality and candidate success at completion. Cumulative GPA data will be reviewed annually to ensure programs meet the required 3.0 GPA. Programs must address an average program GPA below 3.0 should the minimum not be met.
- The EPP formed the Equity and Advocacy Council in 2023-2024 as an advisory body to the Executive Steering Committee and the Dean of the School of Education. The Equity and Advocacy Council is charged with (1) defining DEI as they relate to the 3E's, (2) considering how this definition should be integrated throughout the EPP's common assessments, and (3) creating research-based guiding principles to curriculum and assessment development. This purpose aligns with CAEP Standard 1: Content and Pedagogical Knowledge. The Equity and Advocacy Council will be an essential tool in providing recommendations for improving candidates' knowledge of supporting diverse learners.^v viDuring the 2023-2024 academic year, the committee refined the EPP's mission statement with input from various stakeholders.^{vii}
- After the EPP implemented the Queens College Teacher Portfolio Assessment (QCTPA) in Anthology Portfolio in the Fall of 2023, programs backward planned and built assignments and assessments that provide multiple measures across time within programs to measure candidates' knowledge and skills related to planning, teaching, assessing, and reflecting on their teaching practice. New assessments are in place in Anthology Portfolio for the 2024-2025 academic year.
- The EPP agreed to require programs to maintain an 80% pass rate on the New York State Teacher Certification Exams. Therefore, any program that falls below the 80% pass rate on the Content Specialty Test or the Educating All Students Exam must submit an action plan on how the program plans to address the low pass rate. Title II pass rates will be shared with the programs beginning in Fall 2025^{viii}.

Glossary

Departmental Assessment Committee (DAC): A committee within each department that analyzes and interprets program-specific data and makes recommendations to the ESC for change.

Clinical Experience: Guided, hands-on, practical applications and demonstrations of professional knowledge of theory to practice, skills, and dispositions through collaborative and facilitated learning in field-based assignments, tasks, activities, and assessments across various settings. These include, but are not limited to, culminating clinical practices such as student teaching or internship and earlier fieldwork experiences.

Council for the Accreditation of Educator Preparation (CAEP): A nonprofit and nongovernmental agency accrediting educator preparation providers.

EPP Assessment Committee (EAC): EPP-wide committee responsible for establishing assessment priorities, analyzing and interpreting EPP-wide data, providing oversight of programmatic assessments, and developing recommendations and policies regarding all assessment and accreditation activities of the EPP.

Education Preparation Provider (EPP): The term used by CAEP to describe the entity responsible for the preparation of educators. At Queen College, the EPP includes all the programs offered within in the three departments in the School of Education and several programs within departments in other schools.

Executive Steering Committee (ESC): EPP-wide committee that oversees the quality of the EPP's programs by ensuring that the appropriate structures, policies, and procedures are in place to regularly and systematically collect, analyze, and utilize valid and reliable data in the EPP's ongoing process of evaluation and continuous improvement.

Fieldwork Experience: Part of the clinical experience for candidates in initial teacher education programs. These experiences included guided, hands-on, practical demonstrations of professional knowledge of theory to practice, skills, and dispositions through collaborative and facilitated learning in field-based assessments.

HEDI: Advance, New York City's teacher evaluation and development system, includes multiple measures – Measures of Teacher Practice (MOTP) and two different Measures of Student Learning (MOSL) – to create a picture of teacher performance and provide teachers with various sources of feedback to help them develop as educators. HEDI is an abbreviation for the four rating categories – Highly Effective, Effective, Developing, and Ineffective.

Quality Assurance System (QAS): Mechanisms the EPP has established to promote, monitor, evaluate, and enhance operational effectiveness and the quality of our candidates, educators, curriculum, and other program requirements.

Student Teaching: A college-supervised instructional experience in an undergraduate or graduate teacher education program. This hands-on experience requires candidates to teach in a school for a prescribed number of required hours while working with a cooperating teacher.

Transition Points: A series of academic requirements or milestones designed to ensure that candidates have acquired the necessary competencies and expertise to be more effective educators. Progress is evaluated using assessments that align with national standards.

Unit of Analysis: The major entity you analyze in a study. For example, you could analyze a candidate, a course, or program.

Appendix B: EPP-Wide Assessment Specifications and Instruments

Assessment Specifications and Instructions

Assessment	Cumulative Grade Point Average (GPA) at Completion		
Overview of Assessment	GPA data are housed in the CUNYfirst system. Overall GPA is used to assess a		
	candidate's academic performance. The cumulative GPA at completion includes the		
	candidate's performance on all coursework required by the college and their major.		
Type of Assessment	EPP Data Source		
Transition Point	T3 (Program Completion)		
Details of Assessment	T3 (Program Completion): GPA data at this transition point assesses whether the		
Administration	candidate has met the minimum requirements to complete the program. The		
	candidate must meet these minimum GPA requirements to be approved for program		
	completion and recommended for certification.		
Who is completing the	T3 (Program Completion) – Program Coordinator or Graduation Audit Advisor		
assessment/rubric?			
Who/What is being	Candidate's average performance in their studies.		
assessed?			
Responsibility of Instructor (If	Not Applicable		
Applicable)			
Data Location	CUNYfirst		
Benchmark	The exit GPA requirement for all initial and advanced programs is 3.0.		
Data Usage	Data will be analyzed at the program and EPP levels to determine whether our		
	programs are providing the necessary support to ensure our candidates are meeting		
	the required average performance in their studies.		
Link to Assessment	Not Applicable		

Assessment	Professional Competencies, Attitudes and Dispositions (ProCADS) Assessment
Assessment Overview of Assessment	Protessional Competencies, Attitudes and Dispositions (ProCADS) Assessment ProCADS is a research-based measure of professional competencies, attitudes, and dispositions. The professional competencies focus on proficiency in planning, teaching, and assessing as well as other professional competencies including self- presentation, self-representation, professional collegiality, and demeanor, and taking responsibility. In terms of attitudes, ProCADS focuses on three areas: attitudes toward teaching methods, attitudes toward students, and attitudes toward schools. In terms of dispositions, ProCADS focuses on four dispositional areas: open-mindedness, self- reflection, curiosity, and educational equity. All items are tagged to InTASC standards making it possible to analyze data in relation to the four InTASC domains: The Learner and Learning, Content Knowledge, Instructional Practice, and Professional Responsibility. ProCADs is meant to be administered at multiple transition points in the program. The EPP will administer it three times at T1 (admissions), T2 (methods) and T3 (student teaching). At T1, ProCADS is a candidate self-assessment and is being used to allow candidates to understand the expectations of the EPP. At T2, it is completed by the instructor(s), and at T3, the cooperating teacher, the clinical supervisor and the candidate complete it. The longitudinal data allows the EPP to spot potential trouble areas and to assess candidate growth. The potential to use ProCADS in making dismissal decisions is being discussed.
Type of Assessment	Proprietary
Transition Point	T1 (Program Admissions) T2 (Candidate Progression) T3 (Program Completion)
Details of Assessment Administration	 (T1): ProCADS is available to candidates through Survey Monkey. (T2): ProCADS is available to candidates on Anthology Portfolio via their program portfolio. Once a candidate creates their program portfolio, all courses that include a submission on Anthology Portfolio for assessment will be listed. Along with other
	assignments/requirements, candidates will see a folder labeled "ProCADS." If the candidate clicks on the folder, they will be taken to the page to access the survey. Once the survey is completed and the candidate submits it to their instructor, a notification will be triggered for the instructor to assess the candidate using the assessment tool provided.
	(T3): ProCADS is available in the Experiential Learning on Anthology Portfolio (Student Teaching Placement/Internship Placements) for candidates, clinical supervisors, and cooperating teachers. The Field Placement Office will let candidates, clinical supervisors, and cooperating teachers know when the placement is open and available so they can complete their assessments for the semester. Please be sure to complete all assessments by the deadline provided by the Field Placement Office.
Who is completing the assessment/rubric?	Candidate (T1, T2, T3) Instructor (T2) Cooperating Teacher (T3) Clinical Supervisor (T3)
Who/What is being assessed?	Candidate's professional competencies, attitudes, and dispositions

Assessment	Professional Competencies, Attitudes and Dispositions (ProCADS) Assessment
Responsibility of Instructor (If Applicable)	(T1) – The instructor reminds the candidate to complete the self-assessment as early as possible in the semester.
	(T2)—The instructor reminds the candidate to complete the self-assessment as early as possible in the semester. The assessment will be available for the instructor once the candidate submits a prompt for the instructor to assess them. Instructors should complete the assessment by the deadline provided by the Office of Assessment and Accreditation.
	(T3) – The Clinical Supervisor reminds the candidate to complete the self-assessment. The clinical Supervisor will also complete the assessment as part of the Experiential Learning (Student Teaching Placement Assessments) on Anthology Portfolio. Clinical Supervisors should be sure to complete the assessment by the assessment deadline provided by the Field Placement Office.
	Cooperating Teachers will complete the assessment as part of the Experiential
	Learning (Student Teaching Placement Assessments) on Anthology Portfolio. Cooperating Teachers should be sure to complete the assessment by the assessment deadline provided by the Field Placement Office.
Data Location	SurveyMonkey (T1) & Anthology Portfolio (T2 &T3)
Benchmark	ProCADS is being used as a low-stakes formative assessment for guidance.
Validity & Reliability	Provided by the University of Tennessee, Knoxville. Local content validation: Item 7 was removed, and a new item was added in Spring 2020.
Data Usage	The information collected in this assessment will be used to track candidates' competencies, attitudes, and dispositions as the candidate progresses through a program.
Link to Assessment	https://tinyurl.com/EPPProCADS

State public schools effectively. Prospective teachers are evaluated on the following five competency areas: 1. the ability to effectively educate English language learners; 3. the ability to effectively educate students with disabilities and other spectlearning needs; 4. the pedagogical and professional knowledge and skills in relation to teach responsibilities; 5. the pedagogical and professional knowledge and skills in relation to scho home relationships. Assessment	Content Specialty Test (CST): NYS Teacher Certification Exam
Overview of Assessment	The Content Specialty Test (CST) consists of selected-response items measuring content knowledge and one extended constructed-response item measuring pedagogical content knowledge. The constructed-response item is scenario-based and requires candidates to describe an instructional strategy to guide all students in achieving a specific learning goal, assess student understanding, and identify students' strengths and needs.
	The exam was developed to test teacher candidates' knowledge and skills necessary to teach effectively in New York State schools. The test aims to test if the teacher candidate:
	 understands and applies current education research on how students learn; demonstrates mastery of the content and concepts, is a skilled problem solver, and demonstrates strong skills;
	 applies the three-dimensional approach (i.e., disciplinary core ideas, crosscutting concepts, and content-specific practices) to instruction to explain phenomena, solve real-world problems, and make informed decisions; has a broad understanding of the disciplinary core ideas and the crosscutting concepts between disciplines.
	 understands practices and applies concepts, principles, and theories; can communicate information from a variety of source types; knows, demonstrates, and implements policies and procedures to ensure safety and ethical practices;
Type of Assessment	Proprietary
Transition Point	T2 (Candidate Progression)
Course with Assessment Requirement (If Applicable)	Not Applicable
Details of Assessment Administration	Candidates are encouraged to take the CST before student teaching.
Who is completing the	T2 (Candidate Progression) – Program Advisor and Field Placement Office review if the
assessment/rubric?	candidate took CST.
Who/What is being assessed?	Candidate's content knowledge and pedagogical content knowledge.
Responsibility of Instructor (If Applicable)	Not Applicable
Data Location	Anthology Portfolio & Pearson's Results Analyzer
Benchmark	The state requires an overall pass score of 520.
	Programs across the EPP are required to maintain an 80% or above pass rate for all program completers.
Validity & Reliability	Created and validated by Pearson
Data Usage	Data on pass rates will be used to ensure that teacher education preparation programs provide the content and pedagogical knowledge teachers need to succeed in real-world classroom settings.

Assessment	Clinical Experience Survey (Form A, B, C)
Overview of Assessment	The Clinical Experience Survey provides a candidate perspective on the efficacy of the early fieldwork experiences (Form A) and student teaching (Form B) for enhancing their learning and supporting their progress toward becoming effective teachers. On Form A, candidates evaluate the fieldwork assignments, the experience, and the placement site. They also provide information on the populations, activities, and technologies they worked with during the experience. On Form B, candidates evaluate the student teaching assignments, experience, and placement, as well as the cooperating teacher and clinical supervisor. The Clinical Supervisors complete Form C and provide an assessment of the placement site.
Type of Assessment	EPP-Created Survey
Transition Point	T1 (Program Admissions) – Form A T2 (Candidate Progression) – Form A T3 (Program Completion) – Form B and C
Courses with Assessment Requirement (If Applicable)	See Program-Specific Implementation for Course-Embedded Assessments on page 17.
Details of Assessment Administration	 T1 (Program Admissions) – Form A The Clinical Experience Survey Form A will be available to candidates on Anthology Portfolio via their program portfolio. Once a candidate creates their program portfolio, all courses that include a submission on Anthology Portfolio for assessment will be listed. Along with other assignments/requirements, candidates will see a folder labeled "Clinical Experiences Survey." If the candidate clicks on the folder, they will be taken to the page to access the survey. Once the survey is completed, the candidate submits the survey to the Office of Assessment & Accreditation T2 (Candidate Progression) – Form A The Clinical Experience Survey Form A will be available to candidates on Anthology Portfolio via their program portfolio. Once a candidate creates their program portfolio, all courses that include a submission on Anthology Portfolio for assessment will be listed. Along with other assignments/requirements, candidates will see a folder labeled "Clinical Experiences Survey." If the candidate clicks on the folder, they will be taken to the page to access the survey. Once the survey is completed, the candidate submits the survey to the Office of Assessment & Accreditation T3 (Program Completion) – Form B and C The Clinical Experience Survey will be available in Experiential Learning on Anthology Portfolio (Student Teaching Placement). Both the candidate (Form B) and the clinical supervisor (Form C) will have access to the survey and other assessments required for the student teaching placement. The Field Placement Office will create the placement in Experiential Learning and inform candidates and clinical supervisors. Please complete all surveys and assessments by the deadlines provided by the Field Placement Office.

Assessment	Practice Queens College Teacher Portfolio Assessment (QCTPA) Components (Plan, Teach, Assess, Reflect)
	The Practice QCTPA components provide a multi-measure approach to measure candidates' readiness to teach in Pre-K to 12th-grade classrooms by assessing knowledge, skills, and dispositions, focusing on student learning. To align with the School of Education's conceptual framework of Equity, Excellence, and Ethics (3Es) and its mission to provide a progressive education for the next generation of educators, the Practice QCTPA Components align with the principles of culturally responsive pedagogy and assessment as outlined by the NYS Culturally Responsive-Sustaining Education Framework.
Overview of Assessment	 The Practice Components: Planning the Lesson: This component measures the candidate's ability to write a lesson plan.
	 Teaching the Lesson: This component measures the candidates' teaching effectiveness. Assessing Student Learning: This component measures candidates' impact on student learning and their ability to create and implement effective formative assessments that advocate for what students know and how that knowledge can inform future instruction. Reflective Practice: Candidates will engage in reflective practice and how reflective practice can inform professional learning to improve one's habits
— (A	of mind and educational practices.
Type of Assessment Transition Point	EPP-Created
Details of Assessment Administration	T1 (Admissions), T2 (Progression) Candidates will have access to the Practice QCTPA components on Anthology Portfolio via their program portfolio. Once a candidate creates their program portfolio, all courses that include an assessment submission for the Practice QCTPA component on Anthology Portfolio will be listed.
Who is completing the assessment/rubric?	Instructor (T3)
Who is being assessed?	Candidate (T3)
Responsibility of Instructor (If Applicable)	Instructors will assess the Practice QCTPA Components.
Data Location	Anthology Portfolio
Benchmark	Scores at Level 2 are deemed acceptable for candidates.
Validity & Reliability	EPP piloted the QCTPA and its components in Spring 2023. Validity and reliability studies were conducted in the Summer of 2023. Full implementation of the QCTPA and components occurred in Fall 2023. Programs have embedded the Practice
	QCTPA component assessments into course assignments to allow for data on candidates' growth over time as it relates to each component. These new Practice QCTPA Component Assessments are being implemented in the fall 2024.
Data Usage	candidates' growth over time as it relates to each component. These new Practice

Overview of Assessment Overview of Assessment
 habits of mind and educational practices. Candidates will be asked to engage in collaborative inquiry with colleagues and mentors in professional learning communities to explore problems of practice for further exploration. Candidates will produce artifacts as designated by their instructor, which may include professional learning projects, reteaching lessons in their seminar class for peer feedback, or participating in pedagogical or curriculum-based inquiry groups. The sections are the minimum requirements for the Portfolio. The School of

Assessment	Queens College Teacher Portfolio Assessment (QCTPA)
Type of Assessment	EPP-Created
Transition Point	T3 (Program Completion)
Details of Assessment Administration	The QCTPA will be available to candidates on Anthology Portfolio via their program portfolio. Once a candidate creates their program portfolio, all courses that include a submission on Anthology Portfolio for assessment will be listed. Along with other assignments/requirements, candidates will see a folder labeled "QCTPA." If the candidate clicks on the folder, the folder will expand to show instructions on creating the QCTPA. When the candidates add the QCTPA, they will be taken into the portfolio and have access to all five parts of the portfolio for completion and submission.
Who is completing the assessment/rubric?	Instructor (T3)
Who is being assessed?	Candidate (T3)
Responsibility of Instructor (If Applicable)	Instructors will assess the QCTPA Parts I, II, III, and V. Part IV is a candidate's self- assessment submitted to the Office of Assessment & Accreditation.
Data Location	Anthology Portfolio
Benchmark	Scores at Level 3 are deemed acceptable for candidates.
Validity & Reliability	EPP piloted the QCTPA in Spring 2023. Validity and reliability studies were conducted in the Summer 2023. Full implementation of the QCTPA occurred in Fall 2023.
Data Usage	These data allow the EPP to determine whether teacher education candidates are acquiring the knowledge, skills, and dispositions to successfully plan, implement, and assess their teaching.
Link to Assessment	https://tinyurl.com/QCTPAHB

Assessment	Advanced Program Assessment of Knowledge, Skills, and Dispositions
Overview of Assessment	Advanced programs developed assignments and assessments aligned with the CAEP Advanced Standards and National Standards. Components provide a multi-measure approach to assessing advanced candidates' knowledge, skills, and professional dispositions. Each program is required to have at least one assessment at each transition point (T1 – Admissions, T2 – Progression, T3 – Completion)
Type of Assessment	EPP-Created
Transition Point	T1 (Admissions), T2 (Progression), T3 (Completion)
Details of Assessment Administration	Candidates will have access to the assignments and corresponding assessments on Anthology Portfolio via their program portfolio. Once a candidate creates their program portfolio, all courses that include an assessment will be listed.
Who is completing the assessment/rubric?	Instructor (T1, T2, T3)
Who is being assessed?	Candidate (T1, T2, T3)
Responsibility of Instructor (If Applicable)	Instructors will assess the assignments submitted by each candidate in the designated courses, which are available in Appendix A: Program-Specific Course- Embedded Assessment Charts on page 17.
Data Location	Anthology Portfolio
Benchmark	Scores at Level 3 are deemed acceptable for candidates.
Validity & Reliability	EPP implemented all-new advanced program assessments in the Fall of 2024.
Data Usage	These data allow the EPP to determine whether advanced candidates acquire the knowledge, skills, and dispositions for their profession in education.
Link to Assessment	Program assessments vary and can be accessed in Anthology Portfolio.

Assessment	Completer Survey
Overview of Assessment	Completed in the last course of a program when applying for a college recommendation, the Completer Survey measures candidates' perceptions of the quality of the EPP's teacher education program and how well it prepared them to be teachers. Candidates rate each program element and the student teaching experience. Program areas assessed include program structure/quality, instructional practices, working with diverse learners, the learning environment, professionalism, and the student teaching experience.
Type of Assessment	EPP-Created Survey
Transition Point	T3 (Program Completion)
Details of Assessment Administration	The Completer Survey will be available to candidates on Anthology Portfolio via their program portfolio. Once a candidate creates their program portfolio, all courses that include a submission on Anthology Portfolio for assessment will be listed. Along with other assignments/requirements, candidates will see a folder labeled "Teacher Certification." If the candidate clicks on the folder, the folder will expand to show subfolders. When the candidates click "Completer Survey," they will be taken to the page to access the survey. Once the survey is completed, workshop completion evidence uploaded, and the College Recommendation Request form is completed, the candidate can submit the entire packet to the Teacher Certification Office. The Teacher Certification Office will follow up with candidates to inform them if they are missing anything or must resubmit.
Who is completing the assessment/rubric?	Candidate (T3)
Who is being assessed?	Teacher Education Program
Responsibility of Instructor (If Applicable)	Instructors should encourage candidates to complete the survey before the Office of Assessment & Accreditation deadlines.
Data Location	Anthology Portfolio
Data Usage	The information collected in this assessment will be used to evaluate program elements and student teaching experiences. Data review and analysis may lead to programmatic changes.
Link to Assessment	Teacher Education Completer Survey – Initial Programs <u>https://tinyurl.com/bd4b6b8h</u> Teacher Education Completer Survey – Advanced Programs <u>https://tinyurl.com/mr2ay7rm</u>
	Completer Survey – Special Education Advanced https://tinyurl.com/ytjmyhxr

Assessment	Alumni Follow-Up Survey
Overview of Assessment	Completed by EPP alumni at the end of their first full year of teaching, the Alumni Follow-Up Survey provides information regarding completers' employment status and the extent to which they feel prepared for teaching responsibilities. The survey contains a final section that also assesses completers' perceptions of how well- prepared they were for their first year of teaching. The parallel structure of this survey is like the Completer Survey, allowing for direct comparison of candidate responses at the end of their program and again at the end of their first year of teaching.
Type of Assessment	EPP-Created Survey
Transition Point	T4 (Follow-Up)
Details of Assessment	The Alumni Follow-Up Survey will be available to alumni one year after graduation
Administration	and sent to candidates via email through SurveyMonkey.
Who is completing the assessment/rubric?	Alumni (T4)
Who/what is being assessed?	Teacher Education Program and Impact on current teaching experience
Responsibility of Instructor (If Applicable)	Not Applicable
Data Location	SurveyMonkey
Validity & Reliability	The EPP piloted the survey in the Summer of 2022 and fully implemented it in the Summer of 2023. Data reports will be shared with the EPP Assessment Committee in Fall 2024.
Data Usage	The information collected in this assessment will be used to assess the teacher preparation programs in the School of Education at Queens College. Data review and analysis may lead to programmatic changes.
Link to Assessment	Alumni Follow-Up Survey – Initial Programs <u>https://tinyurl.com/3rup456r</u> Alumni Follow-Up Survey – Advanced Programs
	https://tinyurl.com/4s5jye87

Assessment	Employers Survey
Overview of Assessment	Administered to direct supervisors of EPP completers employed in schools. Designed to gain employers' perspectives on first-year teachers' readiness for the teaching profession. The survey asks employers to assess the quality of program completers' instructional practices, ability to work with diverse learners, ability to establish a positive classroom environment, and levels of professionalism. The Employer Survey is closely aligned with the Alumni Follow-Up Survey to facilitate comparisons between novice teachers' and supervisors' perspectives.
Transition Point	T4 (Follow-Up)
Details of Assessment Administration	The Employer Survey is provided to employers of alumni when they attend specific School of Education events for principals and superintendents. This allows the EPP to capture as many employers as possible.
Who is completing the assessment/rubric?	Employers of Alumni (T4)
Who/What is being assessed?	Teacher Education Program Completers (Alumni) Preparation
Data Location	Excel spreadsheet is stored with the Office of Assessment & Accreditation.
Validity & Reliability	EPP piloted the survey in Fall 2022 via SurveyMonkey. After reviewing the data, the EPP realized that low N would continue to be an issue. Due to a recommendation from the Dean's Advisory Board for P-12 Education, the survey is now being dispensed via paper to employers when they visit campus for various events.
Data Usage	The information collected in this assessment will be used to assess the teacher preparation programs in the School of Education at Queens College. Data analysis and review may lead to programmatic changes.
Link to Assessment	https://tinyurl.com/EPPEmploySurv

Assessment	Alumni Impact Study
Overview of Assessment	The Alumni Impact Study (AIS) ^{i×} is a research plan that draws on multiple data sources designed to examine our completers' impact on student learning. The QC EPP defines <i>impact</i> as a process by which completers engage in reflective and data- informed decision-making to improve their instruction and student interactions that lead to student growth in both cognitive (e.g., academic) and non-cognitive (e.g., social, emotional, and physical) domains (R1.1). The impact measurement in academic domains is grounded in New York State and national content-specific standards. In line with the mission and conceptual framework that centers on Equity, Excellence, and Ethics, the EPP is also concerned with the impact completers have on diversity, equity, and inclusion in student learning and growth (R1.1). In alignment with measures outlined in the Queens College Teacher Portfolio Assessment (QCTPA), the AIS will answer the question: What impact do our completers have on student learning through teaching, assessment, and reflective practice?
Type of Assessment	EPP-Created
Transition Point	T4 (Follow-Up)
Details of Assessment Administration	The Alumni Impact Study will take a nested case study approach. In this approach, cases are nested within other cases. In other words, while each participating alumni is viewed as a case, the total cases come together to form a larger case composed of all participating alumni. This approach allows for both within- and cross-case analyses to answer the study question and sub-questions. Participant Selection Participants for this study will be selected based on two criteria. First, participating alumni must have completed their initial certification program two years prior, so they must be in their third year of teaching. Second, the participating alumni must teach in a New York State public school. Data Collection Alumni Impact Interviews. Participants are interviewed with a semi-structured interview that focuses on their impact on student learning. The Alumni Impact Interviews focuses on three areas: (1) teaching an instructional unit, (2) assessment in one instructional unit, and (3) data analysis and use. Each interview takes approximately 20-30 minutes and is conducted over Zoom. The interviews are recorded with the Zoom transcription features. Instructional Artifacts. Participants are asked to consider one unit that they recently taught and provide 1-3 teaching artifacts prior to the interview. Assessment and Assessment Data. Participants are asked to share at least one assessment from that unit prior to the interview. Participants are asked to share deidentified examples of student work on the assessment.
	Data Analysis

Assessment	Alumni Impact Study
	The interviews, artifacts, and assessments are analyzed through a series of rubrics
	based on the QCTPA outline below.

Date Needed by:

Note - Please allow at least 2 weeks processing time for all requests. Unclear requests may delay processing times.

Guiding questions:

- What statistics do you need? (means, standard deviations, percentages, etc.)
- Do you need results for a specific semester or academic year? Which
- semesters/academic years?
- Do you need results aggregated/disaggregated by certain fields/variables?
- Do you need data for a specific department or program?

Please provide a detail description of the data using the guiding questions above:

*If you want the data summarized in tables in a particular way, please attach a document with the layout of the table you expect.

Comments & Notes:

End Notes

ⁱ The EPP developed an EPP-wide Teacher Performance Assessment (the Queens College Teacher Portfolio Assessment – QCTPA) implemented in Fall 2023 with program completers. The EPP programs then integrated the QCTPA components into each transition point to address multiple measures of candidates' knowledge and skills and provide data for program improvement and accreditation requirements. Materials related to this work can be found in meeting minutes across the EPP's committees. (EPP Assessment Committee Meeting Minutes on February 16, 2023; EPP Assessment Committee Meeting Minutes on April 20, 2023; EPP Assessment Committee Meeting on May 10, 2023; EPP Assessment Committee Meeting Minutes on September 19, 2023; Executive Steering Committee Meeting on May 16, 2023)..

ⁱⁱ As of the Fall 2022, the EPP voted (<u>EPP Assessment Committee Meeting on October 25, 2023</u>) to use the cumulative grade point average at T3 (Completion) as a measure of candidates' knowledge, skills, and dispositions and readiness to graduate, be recommended for initial certification, and transition into the teaching profession. The EPP felt that the cumulative GPA at completion was the best measure of candidate success and provided programs with a clear measure across the EPP for program improvement based on data review.

^{III} The EPP uses Anthology Portfolio to capture data. Anthology Portfolio used to be known as Chalk and Wire. As of Fall 2021, the system name has changed, but the functionality remains the same.

^{iv} As of the Spring 2023 semester, ProCADS at Transition Point 1 (T1) is completed via SurveyMonkey to allow entering candidates access to the survey immediately upon entry into an Education Program. This change was approved at the <u>EPP Assessment Committee Meeting on September 15, 2022</u>.

^v The EPP Assessment Committee approved the development of the EPP Advocacy and Equity Committee during its <u>meeting on September 15, 2022</u>.

^{vi} The 2020-2021 Executive Summary is available in the shared drive at the link provided: <u>2020-2021 Executive</u> <u>Summary</u>. Summative Recommendations Forms are also available at the link provided: <u>T1 2022-2023 Summative</u> <u>Recommendation Form</u>; <u>T3 2023-2022 Summative Recommendation Form</u>

vⁱⁱThe EPP formed the Equity and Advocacy Council in 2023-2024 as an advisory body to the Executive Steering Committee and the Dean of the School of Education. During the academic year, the committee refined the EPP's mission statement with input from various stakeholders. The recommendations can be found at the link provided: EA Council 3Es Recommendations 2023-2024

vⁱⁱⁱ The EPP Assessment Committee agreed unanimously to require programs to maintain an 80% pass rate on the Content Specialty Test and the Educating All Students exam. These two exams are required for initial certification by New York State. Any program not meeting this requirement based on the Title II Report beginning in the Fall of 2025 will be required to create an action plan. <u>EPP Assessment Committee Meeting Minutes 3.5.2024</u>; <u>EPP</u> <u>Assessment Committee Meeting Minutes 5.7.2024</u>.

^{ix} The outline of this study was based on and adapted from the alumni study conducted by the University of Vermont to address Standard 4.1-Impact on P-12 Student Learning and Development.
